Ibrahimpattam, Telangana

+91-7368847502 | Sahgovind582@gmail.com | govind-sah | github.com/myself-govind

Education

GNIT, Guru Nanak Institute of Technology, Hyderabad

2023 – 2027

B.Tech - Computer Science and Engineering

Ibrahimpattam, Telangana

Paradise Campus

2021 – 2023

+2 (Intermediate) - Science

Rajbiraj, Nepal

HappyLand Secondary School

2021

Schooling (10th)

Rajbiraj, Saptari, Nepal

Experience

Google Developer Student Clubs (GDSC)

2024 – Present

Student Contributor

Hyderabad

- Collaborated on software design and UI/UX projects using Figma and modern design principles.
- Worked in team environments to improve innovation and user experience design.
- Participated in project discussions involving analytical thinking and problem-solving approaches.
- Contributed to collaborative activities focused on creativity, communication, and technical learning.

Projects

AI Chatbot | Python, NLP, Machine Learning

2025

Intelligent Conversational Agent

- Developed an AI-powered chatbot using natural language processing techniques to understand and respond to user queries in real time.
- Implemented intent classification and entity extraction pipelines to accurately interpret user messages and route them to appropriate response handlers.
- Integrated machine learning models for context-aware dialogue management, enabling multi-turn conversations with coherent responses.
- Designed a modular architecture with extensible knowledge base support, allowing easy integration of new domains and frequently asked questions.

Robust License Plate Detection | OpenCV, Python, Computer Vision

2025

Vehicle Identification System

- Built a robust license plate detection system using OpenCV and computer vision techniques to localize and extract vehicle license plates from images and video streams.
- Implemented image preprocessing pipelines including grayscale conversion, edge detection, and morphological operations to enhance plate region visibility under varying lighting and weather conditions.
- Applied contour analysis and Haar cascade classifiers to accurately identify and crop license plate regions with high detection accuracy.
- Integrated optical character recognition (OCR) to extract alphanumeric text from detected plates, enabling automated vehicle identification and logging.

Portfolio Website | HTML, CSS, JavaScript

2025

Personal Project

- Designed and developed a responsive portfolio website to showcase projects, achievements, and technical skills.
- Created modern and user-friendly UI/UX layouts for improved accessibility and engagement.
- Implemented responsive design techniques to ensure compatibility across multiple devices.

Technical Skills

- **Languages / Concepts:** Python, Java, C, JavaScript, Software Engineering Basics, AI Fundamentals
- **Databases:** MySQL
- **Frameworks / Libraries:** OpenCV, HTML, CSS, JavaScript, NLP
- **Tools / Technologies:** Git, GitHub, Microsoft Excel, Haar Cascade, OCR
- **Developer Tools:** VS Code, Canva, Figma
- **Soft Skills:** Problem Solving, Communication, Team Collaboration, Leadership, Adaptability

Certifications

- Fundamentals of UI/UX Design
- Foundation of User Experience (UX) Design
- Introduction to Software Engineering
- Introduction to Artificial Intelligence
- Human Resources Conclave

Extra Curricular

UI/UX Design and Technical Activities Coordinator

- Participated in technical and design-related student activities and collaborative projects.
- Assisted in organizing innovation-focused events and team discussions.
- Contributed to creative UI/UX concepts and student engagement activities.
- Coordinated with teams to streamline event logistics, communication, and technical support, ensuring a successful outcome.
